

Neural network's structural test:

Adam epochs -> 500

Max L-BFGS iterations -> 2000

Train T -> 1.0 s

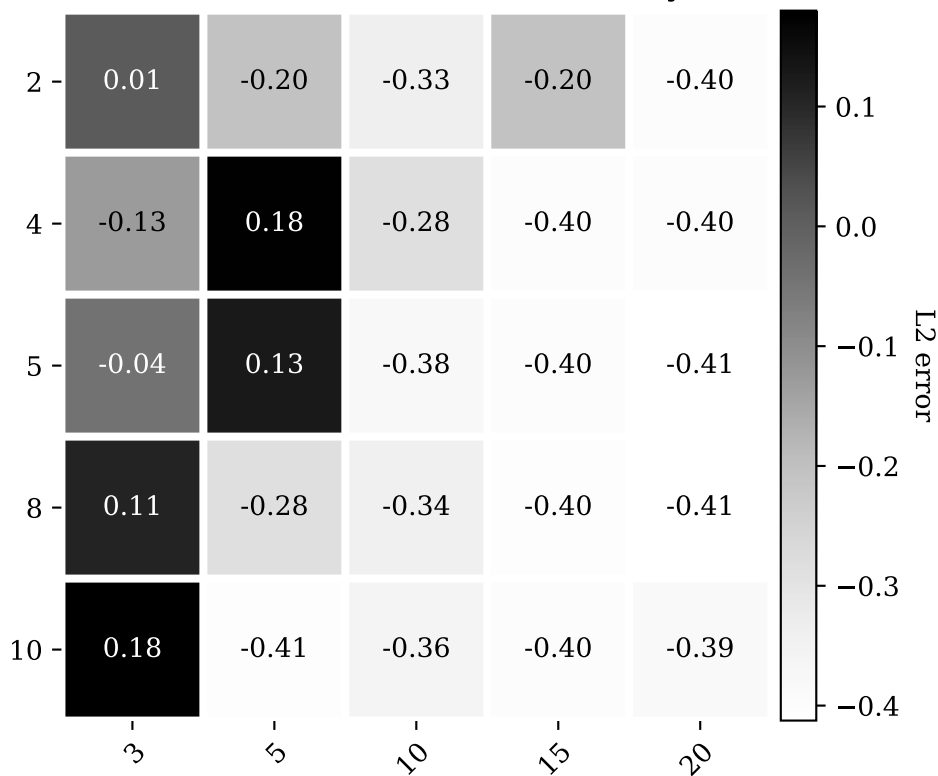

Train Nu -> 1000

Train Nf -> 100000

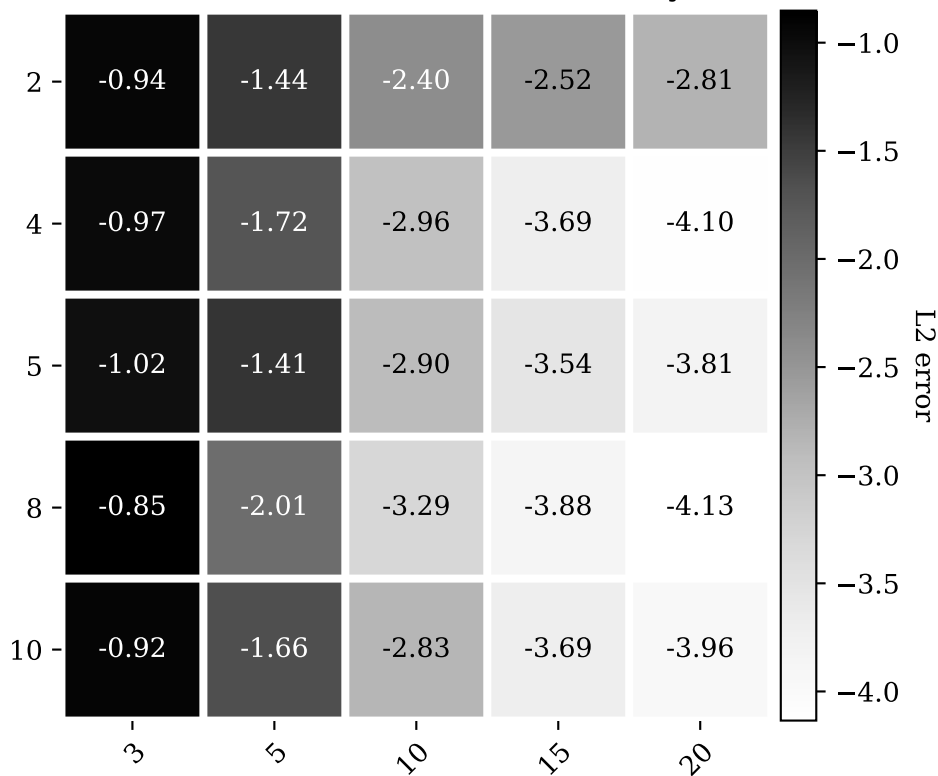

Validation points -> 1810

Validation T -> 0.5 s

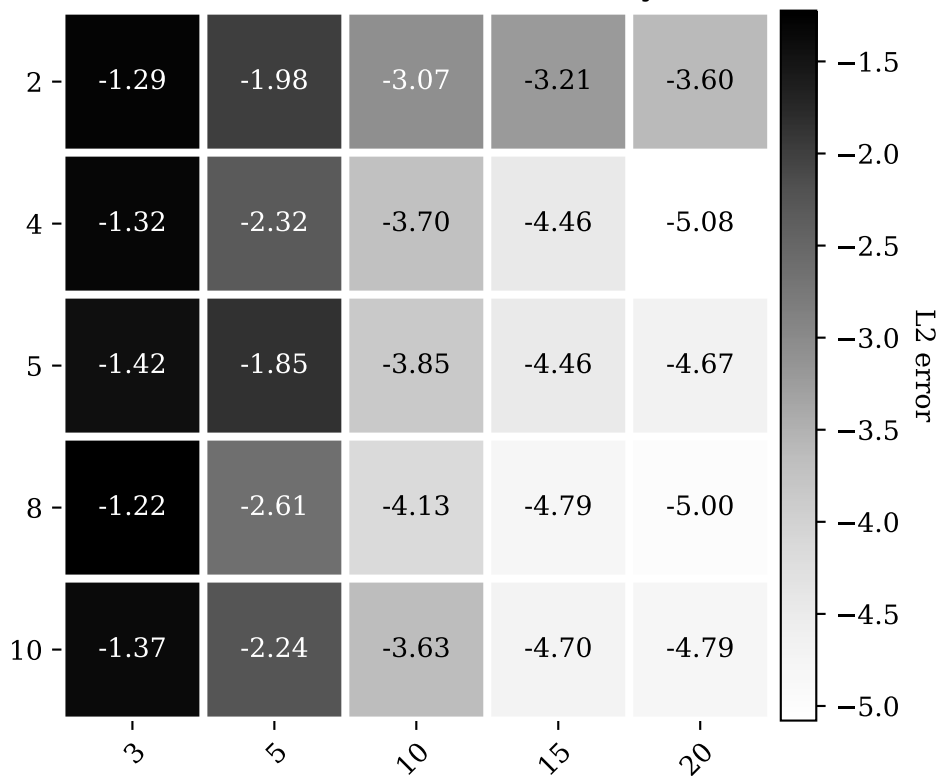

Final validation losses (neurons x layers)

Final train total losses (neurons x layers)

Final train u losses (neurons x layers)

Final train f losses (neurons x layers)
